Digital AR™

US Optical has created our own Anti Reflective Coating Brand: Digital AR™

US Optical's in-house **Digital AR™** brand is the perfect match when applied to Freeform High Definition (HD) lenses. **Digital AR™** has been created to further protect and enhance the optics and cosmetics of digital lenses. **Digital AR™** gives your Freeform Digital lenses an HD plus effect!"

In addition, non freeform traditional lenses benefit too, with the superior effects and protection of our **Digital AR™**. **Digital AR™** enhances the looks of traditional lenses. It makes them look less traditional and more HD!
